ABOUT ME

I'm Swati, an aspiring data analyst passionate about turning data into clear, meaningful insights. Based in India, I'm currently building projects focused on analytics, visualization, and business problem-solving while sharpening my skills in SQL, Excel, Python, and Power BI/ Tableau. I enjoy uncovering patterns, asking the right questions, and transforming complex data into actionable stories.

MY TECH STACK

SQL

Python

Excel

Pandas

NumPy

Power BI

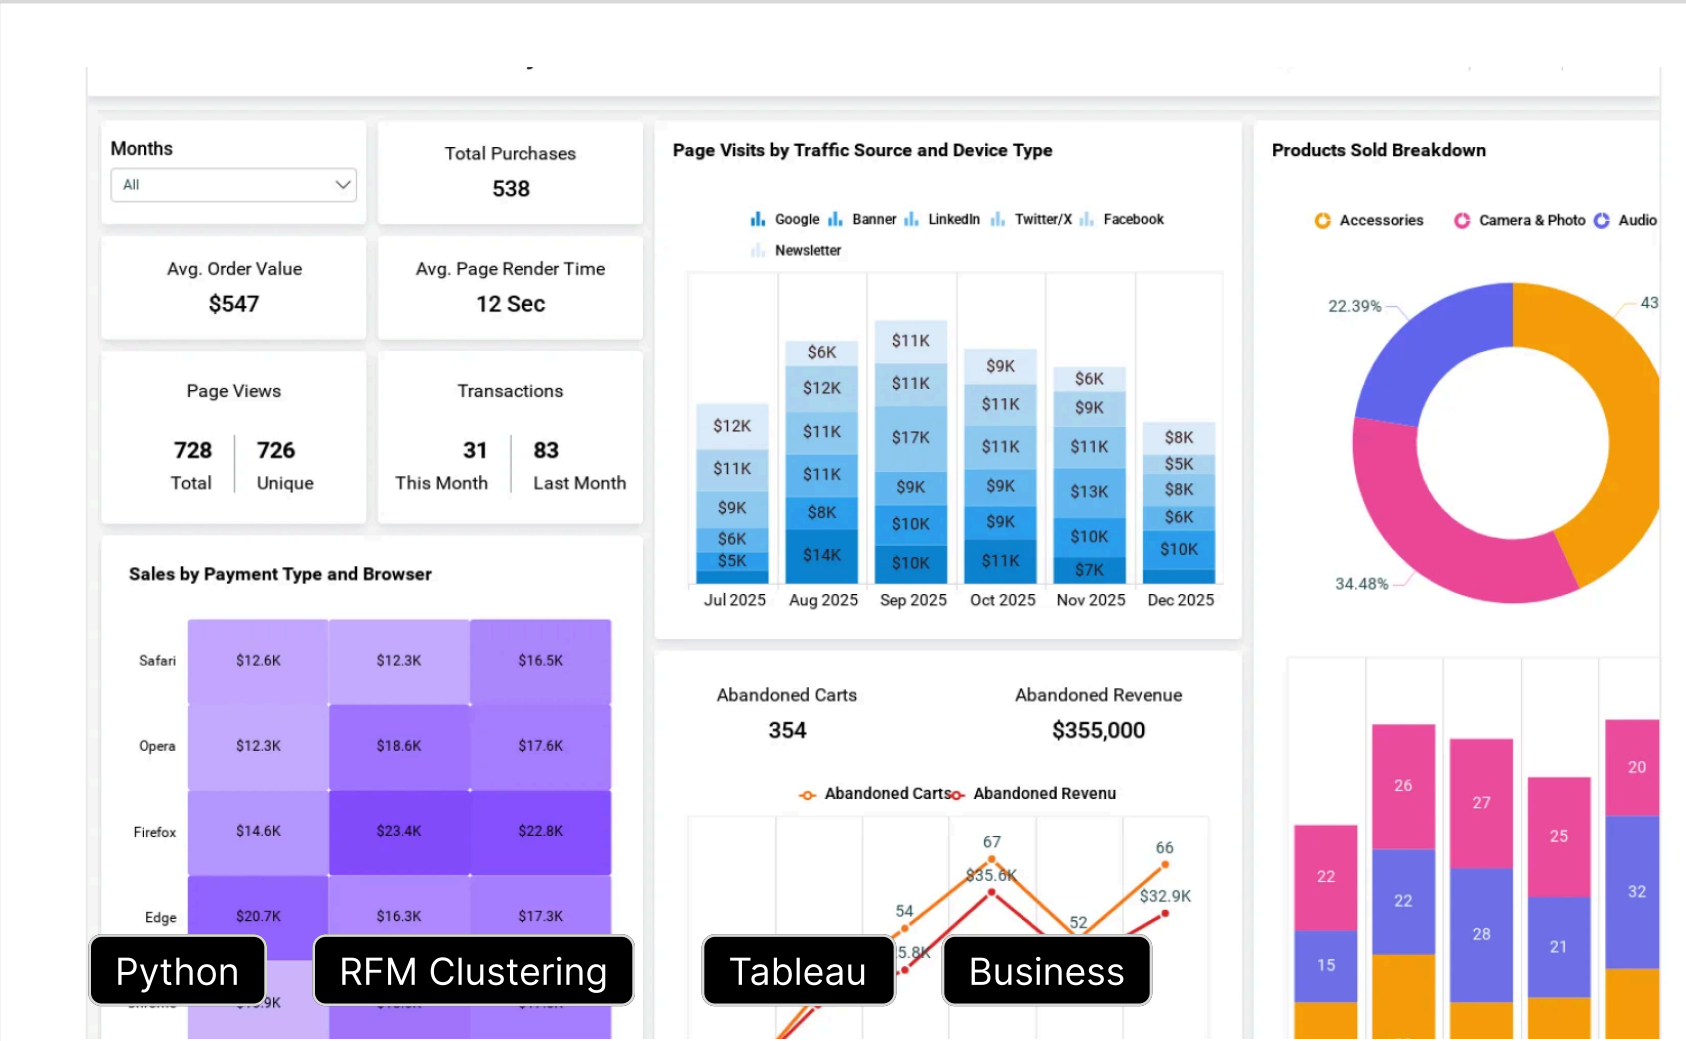

Tableau

Matplotlib

Git

Jupyter Notebook

MY WORKS

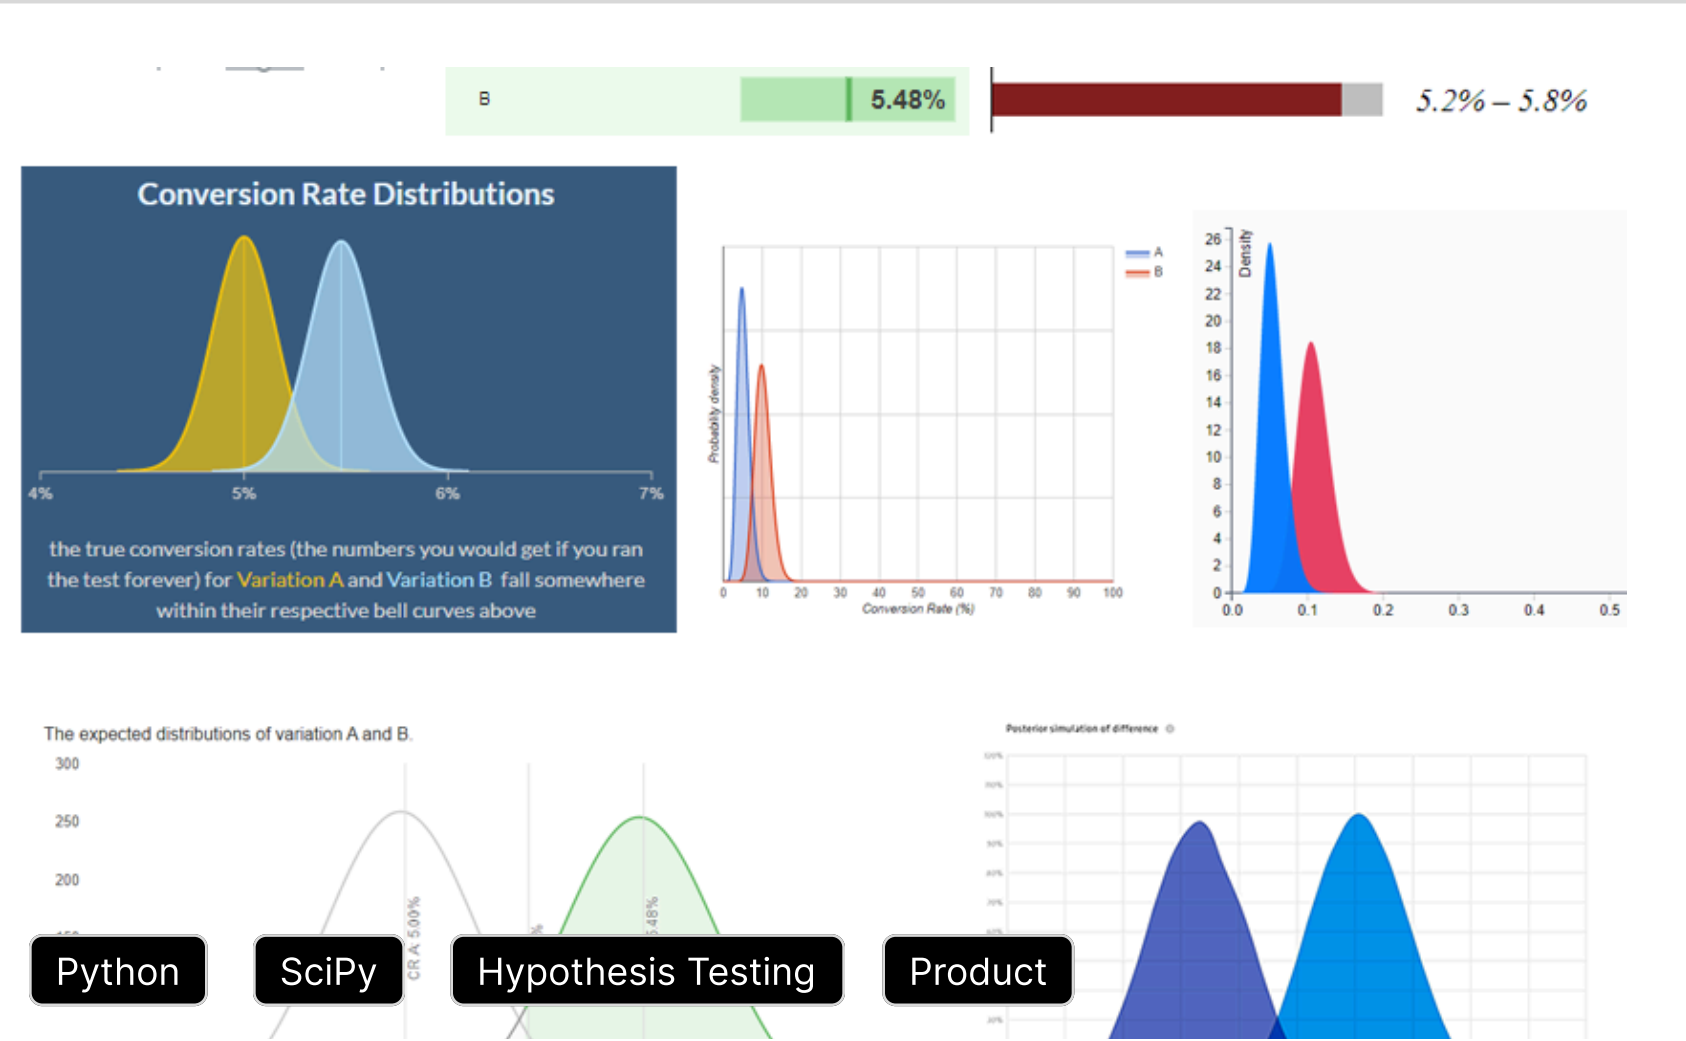

E-commerce Customer Behavior & Revenue Optimization

Transformed raw transactional data into targeted growth strategies by identifying high-value customer segments and hidden churn risks using RFM analysis. Replaced generic mass marketing with data-backed recommendations to maximize customer lifetime value.

A/B Testing & Product Decision Analysis

Evaluated user engagement data across control and treatment groups to determine if a newly designed product feature drove a statistically significant lift in conversion. Utilized frequentist hypothesis testing to mitigate risk and guide the final launch decision.

Job Market Analysis Dashboard

Engineered an end-to-end data pipeline to aggregate, clean, and analyze 15,000+ active job listings. Developed an interactive executive dashboard to uncover real-time hiring trends, regional salary distributions, and cross-functional technology skill gaps.

OmniChannel Retail Velocity & Revenue Intelligence Engine

Analyzed millions of multi-category sales records to map purchasing cadence, product affinity, and seasonal demand fluctuations. Built an interactive executive engine tracking monthly revenue velocity and customer segment value to optimize inventory allocation decisions.
